CIS deploys innovative premises disinfection solutions on its operating sites

In response to the global health crisis following the spread of the Covid-19 virus, the CIS Group has expanded its services in terms of facilities' disinfection.

On all of the sites, sanitary measures have been reinforced. CIS teams provide increased cleaning and disinfection with suitable equipment and products certified by recognized international organizations.

In Chad, CIS recently implemented this type of disinfection equipment using a biodegradable solution for automated misting of dry gas, with a first deployment on ExxonMobil remote site, to the great satisfaction of our client.

This solution is used to clean and disinfect central kitchens, restaurants, bedrooms, office spaces and technical facilities on remote sites.

CIS aims to deploy these virus detection and disinfection processes across all of its operating sites to protect its teams and clients while ensuring the continuity of its activities in strict compliance with health safety rules.

About CIS

Since 1992, CIS Group has been supporting major players in the hydrocarbon, mining, construction and armed forces sectors, at every stage of their projects, in the most remote offshore and onshore environments. As a provider of integrated services, CIS has a full range of services and turnkey solutions designed to assure the well-being and safety of the residents of the remote sites so that our customers can concentrate on their own core businesses.

Present in 20 countries with nearly 230 operating sites and a worldwide staff today numbering more than 12,500, CIS has a strong commitment to contributing to the economic and social development of the local populations and countries where it operates.
